

Filling out your Bubble Sheet correctly

1. It is important to use HB #2 Pencils for best coverage and scanning.
2. **TIP:** If you can still see the letter through your bubble marking, your answer will **not** scan properly in the ScanTron.

Example of Correct Bubble Coverage

31 ● (B) (C) (D)
32 (A) ● (C) (D)

Example of good bubble coverage.
Markings are dark and letters inside bubbles are completely covered.

Example of Poor Bubble Coverage

6 (A) (B) (C) (D)
7 (A) (B) (C) (D)

The example shown here will not scan correctly. The markings are too light and the letters within bubbles can be seen through the marking.

Changing your answer

41 ~~(A)~~ (B) (C) ●

It is no problem for you to change your answer. If your eraser does not completely remove the mark of your original answer, you can cross out the answer and then ensure your chosen answer is darkly filled.
